RESEARCH INTERESTS

Morphology	Word-based theories, paradigmatic structure, the inflection-derivation continuum, defectiveness, truncation.
Language and Cognition	The structure of the mental lexicon, frequency effects, language and memory, emergentist approaches to linguistic structure.
Quantitative Approaches	Experimental design, corpus linguistics, frequentist and bayesian statistical modeling, information theory, network theory.
Language Documentation	Computational methods in fieldwork.

EDUCATION

Université Paris Cité *2019 - 2023*
PhD in Language Sciences. Thesis: *The paradigmatic organisation of morphological knowledge*

University of Cambridge *2018*
MPhil in Theoretical and Applied Linguistics. Thesis: *Faux-pacity: an analogical reanalysis of phonological opacity and evidence in favour* — *Distinction*

University of Cambridge *2017*
BA in Theoretical and Applied Linguistics. Dissertation: *Nasals are the colour of the morning sky: synaesthetic correlates of phonological distinctive features* — *First Class Honours*

ACADEMIC EMPLOYMENT

The Ohio State University *October 2023 - Sep 2025*
Postdoctoral researcher. Project: *A graph-theoretic approach to the mental lexicon*

Université Paris Cité *Feb 2023 - Aug 2023*
Study engineer. Project: *Formal models of social meaning and identity construction through language.*
